

## Water Meter (for Hot water)

Size: 3/4"

Dial Type: Dry Dial

### Description

- Single -jet turbine water meter
- Meter is suitable for hot water up to 90 °C
- Direct read roller indicator
- Dry dial magnetic coupling
- Ideal for installation in areas with highly variable changes in pressure
- For cloudy and heavily calcareous water: a completely dry and unsubmerged register
- B/H approval: Class B, horizontal
- A/V approval: Class A, vertical
- May be installed in any position
- Manually rotatable dial: for easy reading any direction
- Tamperproof glass cover: against unauthorised or illegal interference
- Hydraulic features in line with EEC standards following provision no 75/33

Maximum flow rate:	5 m <sup>3</sup> /h
Nominal continuous flow rate:	2.5 m <sup>3</sup> /h
Transitional flow rate with $\pm 2\%$ <u>error in Class B</u>	200
Transitional flow rate with $\pm 2\%$ <u>error in Class A</u>	250
Minimum flow rate with $\pm 5\%$ error <u>in Class B</u>	50
Minimum flow rate with $\pm 5\%$ error <u>in Class A</u>	100
Starting flow:	15
Dial register from/to:	0,0001/100,000
Working pressure:	16 bar
