

Pipe Stat (Tamperproof)

Adjustable thermostat: 20 – 90 °C

Mechanical room thermostats TA2n - Room thermostats

Room thermostat gas filled bellows operating, single pole, switching contacts, is particularly suitable for commercial premises as well as applications in the field of home, industrial heating and air conditioning.

Function:

This surface mounted thermostat controls the water temperature in domestic hot water cylinders or in pipes. Suitable for switching motorized valves, circulating pumps or boilers, the thermostats incorporate a bi-metallic temperature sensor. The cylinder thermostat is suitable for bare or pre-insulated cylinders and is simply installed using a coiled wire fixing and Metalcrom paste tube which is also included.
