

Water Meter (for Cold Water and Billing Purposes) with pulsed output

Size: 1/2"

Model: PS100001

Type: Cold Water Pulsed Meter

Description

- Body is made from brass
- Meter is suitable for COLD water up to 30 °C
- The meter has magnetic transmission; therefore the gearings are not in contact with water.
- The roller counter mechanism is air tight, thus avoiding the possibility of moisture ingress
- Suitable for horizontal or vertical installation
- The roller counter is positioned for easy reading and if required can be used with pulse transmission (1 per litre)

Approvals: WRC, DTI
