

Foot Valve with strainer

Model: FOOT150

Size: 1 1/2"

Maximum working temperature: 110 °C

Maximum working pressure: 10

Strainer: AISI 304 Inox Steel

Valve: Brass

Function:

Foot Valves are a form of check valve, installed at the bottom of Pump suction line, inside the wet well. Foot valves are an inexpensive way to prime a single centrifugal pump. Since Foot Valves are continually submerged in the wet well and not readily accessible for inspection or repair, it is important to select a Foot Valve of high quality long wearing construction.
