

Vertical Potable Expansion Vessel

Size: 5 Ltr

- Maximum working pressure 10 bar
- Pre-charge 1.5 bar
- Temperature range - 10 °C + 70 °C
- Dimensions D 200 x 265 Height
- Water Connection 3/4"
- Weight 2 Kilos
- High resistant rubber bladder

Approvals:-

CE endorsed, TUV

This tank is used in the following installation cases:

Potable water applications, booster sets, borehole pumps etc, expanded water from hot water cylinders and calorifiers.

The tanks can be set up with a pump unit and pressure switch etc to reduce the number of starts and stops per hour.

An additional item which should be included when purchasing a vessel is the vessel isolation connection valve. This allows the vessel to be removed for maintenance without draining the fluid from the system.
