

Heating Expansion Vessel ONLY

Model: IB035EV

Size: 35 Ltr

Product no: 02035343

Maximum working pressure 6 bar
Pre-charge 1.5 bar
Temperature range - 10 °C + 100 °C
Dimensions D 360 x 475 Height
Water Connection 3/4"
Weight 7 Kilos
High resistant rubber bladder
Floor mounted – does not require a bracket

Approvals:- (Vessel) CE endorsed, TUV

The central heating system most commonly used in Europe and other parts of the world is a sealed system. Ease of installation makes it particularly attractive to the installer, as a sealed system alleviates the need to fit, feed and vent tanks in the central heating system.

System flexibility - due to component siting alternatives
cost savings - due to considerably reduced installation time
no feed and expansion tank - hence avoiding 'pumping over' problems, risk of freezing up etc.
longer life - due to virtual elimination of corrosion problems
noise reduction - due to higher system pressure, boiler noise (localised heating) is significantly reduced or eliminated
low maintenance cost - as equipment is virtually maintenance free, other than for periodic operational checks
