

Heating Expansion Vessel ONLY

Model: IB80EV

Size: 80 Ltr

Product no: 04080351

- Maximum working pressure 6 bar
- Pre-charge 1.5 bar
- Temperature range - 10 °C + 100 °C
- Dimensions D 485 x 570 Height
- Water Connection 1"
- Weight 16 Kilos
- High resistant rubber bladder
- Foot Mounted – no bracket required

Approvals:- (Vessel) CE endorsed, TUV

The central heating system most commonly used in Europe and other parts of the world is a sealed system. Ease of installation makes it particularly attractive to the installer, as a sealed system alleviates the need to fit, feed and vent tanks in the central heating system.

- System flexibility - due to component siting alternatives
- cost savings - due to considerably reduced installation time
- no feed and expansion tank - hence avoiding 'pumping over' problems, risk of freezing up etc.
- longer life - due to virtual elimination of corrosion problems
- noise reduction - due to higher system pressure, boiler noise (localised heating) is significantly reduced or eliminated
- low maintenance cost - as equipment is virtually maintenance free, other than for periodic operational checks
