

## Heating Expansion Vessel ONLY

**Model: IB200EV**

**Product no: 04200351**

**Size: 200 Ltr Heating**

Maximum working pressure 6 bar  
Pre charge 1.5 bar  
Top connection  
Maximum operating temperature 100 °C  
Dimensions D 600 x 835 Height  
Water Connection 1"  
Weight 36 kilos  
High resistant rubber bladder

**Approvals:-** (Vessel) CE endorsed, TUV

The central heating system most commonly used in Europe and other parts of the world is a sealed system. Ease of installation makes it particularly attractive to the installer, as a sealed system alleviates the need to fit, feed and vent tanks in the central heating system.

**System flexibility** - due to component siting alternatives  
**cost savings** - due to considerably reduced installation time  
**no feed and expansion tank** - hence avoiding 'pumping over' problems, risk of freezing up etc.  
**longer life** - due to virtual elimination of corrosion problems  
**noise reduction** - due to higher system pressure, boiler noise (localised heating) is significantly reduced or eliminated  
**low maintenance cost** - as equipment is virtually maintenance free, other than for periodic operational checks
