

Heating Expansion Vessel ONLY

Size: 300 Ltr Heating

Product no: 4300351

Maximum working pressure 6 bar
Pre-charge 1.5 bar
Top connection
Maximum operating temperature 100 °C
Dimensions D 600 x 1240 Height
Water Connection 1"
Weight 49 kilos
High resistant rubber bladder

Approvals:- (Vessel) CE endorsed, TUV

The central heating system most commonly used in Europe and other parts of the world is a sealed system. Ease of installation makes it particularly attractive to the installer, as a sealed system alleviates the need to fit, feed and vent tanks in the central heating system.

System flexibility - due to component siting alternatives
cost savings - due to considerably reduced installation time
no feed and expansion tank - hence avoiding 'pumping over' problems, risk of freezing up etc.
longer life - due to virtual elimination of corrosion problems
noise reduction - due to higher system pressure, boiler noise (localised heating) is significantly reduced or eliminated
low maintenance cost - as equipment is virtually maintenance free, other than for periodic operational checks
