

Heating Expansion Vessel

Size: 400 Ltr Heating

Product no: 04400351

Maximum working pressure 6 bar
Pre-charge 1.5 bar
Top Connection
Maximum operating temperature 100 °C
Dimensions Ø600 x 1480 Height
Water Connection 1"
Weight 56 kilos
High resistant rubber bladder

Approvals:-

CE endorsed, TUV

The central heating system most commonly used in Europe and other parts of the world is a sealed system. Ease of installation makes it particularly attractive to the installer, as a sealed system alleviates the need to fit, feed and vent tanks in the central heating system.

System flexibility - due to component siting alternatives

cost savings - due to considerably reduced installation time

no feed and expansion tank - hence avoiding 'pumping over' problems, risk of freezing up etc.

longer life - due to virtual elimination of corrosion problems

noise reduction - due to higher system pressure, boiler noise (localised heating) is significantly reduced or eliminated

~~low maintenance cost~~ as equipment is virtually maintenance free,
