

Heating Expansion Vessel ONLY

Model: IB600EV

Product no: 04600351

Size: 600 Ltr Heating

- Maximum working pressure 6 bar
- Pre-charge 1.5 bar
- Bottom connection
- Temperature range - 10 °C + 100 °C
- Dimensions D 750 x 1700 Height
- Water Connection 1"
- Weight 77 Kilos
- High resistant rubber bladder

Approvals:- (Vessel) CE endorsed, TUV

The central heating system most commonly used in Europe and other parts of the world is a sealed system. Ease of installation makes it particularly attractive to the installer, as a sealed system alleviates the need to fit, feed and vent tanks in the central heating system.

- **System flexibility** - due to component siting alternatives
 - **cost savings** - due to considerably reduced installation time
 - **no feed and expansion tank** - hence avoiding 'pumping over' problems, risk of freezing up etc.
 - **longer life** - due to virtual elimination of corrosion problems
 - **noise reduction** - due to higher system pressure, boiler noise (localised heating) is significantly reduced or eliminated
 - **low maintenance cost** - as equipment is virtually maintenance free, other than for periodic operational checks
 - **water supply** (water regulations) G.24.1 and 24.2 compliant filling loop
- 10
