

Intamix Pro Under Bath Thermostatic Mixing Valve

Model: IN60007CP

Size: 22mm

Body:	DZR Brass
Cartridge:	DZR Brass
Shutter:	DZR Brass
Spring:	Stainless Steel
Seal Components:	EPDM

Temperature adjustment range:	30 – 65 °C
Maximum Inlet Temperature:	85 °C
Maximum Working pressure:	14 Bar Static
Minimum Working pressure:	0.2 bar

Product Approvals: WRAS and TMV2

The Intatec range of thermostatic mixing valves is designed primarily for bath applications. It delivers safe, blended hot water to taps, showers, bidets and other water outlets, making it ideal for use in domestic applications. The Intamix pro is designed for use in application where a high volume of water is required at the outlet such as a bath. Providing a high volume of water at a stable temperature, the Intamix pro reflects the quality of the Intatec range of total washroom solutions.
