

Intamix Pro V Thermostatic Mixing Valve Screwed Iron

Model: IN60023CP

Connection: 2" m x m x m

Materials:

Body: DZR Brass
Cartridge: DZR Brass
Shutter: DZR Brass
Spring: Stainless Steel
Seal components: EPDM

Temperatures and pressures:

Outlet Temperature range settings: 30 – 65 °C
Minimum flow rate to ensure stable temp: 0.083l/s – 5l/m
Accuracy: ± 2 °C
Max. working pressure: 14 bar – static
5 bar – dynamic
Max. inlet temperature: 85 °C
Max. inlet pressure ration (H/C or C/H) 2:1

- Tamperproof head
- Single piece thermostatic cartridge construction
- High Flow rate
- Adjustable Outlet temperature
- Accessories available
- Automatic shut off in the event of hot or cold water failure
- Temp. stability ± 2 °C

Function:

The Intamix Pro is designed for use in applications where a high volume of water is required at the outlet such as shower blocks and centralised mixing. Providing a high volume of water at a stable temperature the IntaMix Pro reflects the quality of the Intatec range of total washroom solutions.

Approvals: WRAS
