

Inta Infra Red Taps

Model: IR121CP

The Inta range of infra red taps allows a supply of water to be obtained without having direct contact with the outlet spout. The integrated infra red sensor detects the presence of a limb and controls a solenoid valve.

- Water Saving
- Hygienic
- Solid brass structure
- Vandal proof
- Stylish and contemporary
- Autocalibration of the sensor field

Power supply:	Mains Operated
Recommended Water pressure:	1.0 – 0.8 bar
Preset sensor range:	220mm adjustment
Minimum sensor range:	300mm
Security time:	90 Seconds
Hot water temperature:	70 °C maximum
