

Minim Magnetic Filter

Connection Size: 22mm

Model:

Function:

A complete service centre for heating systems, Minim magnetic filter can be purchased as a magnetic filter set or as a centralized valve set for servicing and maintenance. In this form as well as protecting the system boiler and components from debris, scale flakes, sludge etc, it is a fast connect point for filling, flushing and cleaning. Add the minim dosing pot and chemicals can be added quickly, cleanly and effectively.

Fit to RETURN line to Boiler:-

- Magnetic filter
- Strainer filter
- 22mm connections
- Isolation vales
- Compact and slim design
- Demagnetization chamber, magnet can be retracted without drain down using the button. Maglock button then secures the movable magnet in the lower filter chamber for operation
- 14 gauss magnet, 90 micron filter
- Clear plastic sight chamber

Fill and Flush valve set:-

- Simple with fill and flush valve set connection to flushing and de-scaling pumps.
- Connect with filling loop and flush just with fresh water.
- Connection for dosing pot.
- Cost effective, will practically pay for itself.

Minim Dosing Pot:-

- 0.50 litre capacity
- Clear sight chamber
- Connection port for filling loop (filling loop not included)
- Connector to the fill flush valve set
-
