

BWT (Culligan) Combi-care Scale Inhibitor

Model: LFECC15

Connection: 15mm

What is Combi-care?

The combi-care is a polyphosphate dosing system for the control of scale and corrosion within combination boilers and other hot water systems.

Why choose the combi-care?

- Offers protection from both limescale and corrosion
- Suitable for whole house or single appliance protection
- Flow rates up to 30 ltrs/min
- Easy Change cartridge
- Cartridge have a 12 month life.
- Maximum pressure 10 bar
- Maximum Water Temperature 30 °C
- Cartridge life Litres: 120,000

This is the cartridge refill for the Combi-care 15mm or 22mm Hard Water scale Inhibitor. To ensure continual scale protection, this cartridge must be changed every 12 months.

Water is safe to drink when treated through this inhibitor.

Dimensions: 215 Length x 120 Width

Please note: This unit will be affected by hot water transfer back down the system; therefore it should be sited as far away from the boiler as. Do not install where ambient temperature is likely to exceed 40 °C. Protect from freezing.
