

## Culligan Filter Cartridge

Type: MX1

10 litres per minute

Removes bad taste, odour, organic chemicals and pesticides

Removes sediment down to 5 microns

Suitable for NCP1, NP1 and NDL2 units

Diameter 73mm

Length - 250mm

10" water filter cartridges are disposable items that fit inside Culligan NP1 and NDL2 water filter housings. These water filter cartridges are used to filter out undesirable elements from drinking water.

No single water filter cartridge is capable of removing every undesirable element from water. The type of water filter cartridge used is dependant on local conditions. A range of water filter cartridges capable of removing selected elements such as limescale, bad taste, pesticides, particulate matter etc is available.

### Function:

The MX1 carbon block water filter cartridge removes sediment, taste, odour, organic chemicals and pesticides.
