70 years of innovation

With unrivalled expertise in filtered boiling, chilled and sparkling water, Zip Water is known globally for being home to the world's most advanced drinking water systems.

Founded in Australia in 1947, we've always been innovators, advancing and perfecting our drinking water technology for decades. Today, we provide businesses and homes in more than 70 countries with an extensive range of high performance systems to suit any requirement.

Thousands of offices, hospitals, schools, restaurants and residential properties are now benefitting from the purest tasting and cleanest water possible thanks to our cutting edge water filtration technology. And we're proud of the positive impact our drinking water systems have on people's health, wellbeing and productivity.

Transforming the way organisations provide drinking water for employees and visitors alike, our products marry state-of-the-art functionality with modern design, while also helping businesses save valuable time and money.

What's more, our commitment to sustainability means that these same businesses can rely on Zip Water to provide energy efficient, eco-conscious systems that tackle global issues, such as reducing damaging plastic bottle waste.

Think drinking water, think Zip Water.

John Doumani, CEO Zip Industries

Reuse. Refill. Refresh.

The horrifying damage that plastic does to the environment has been well-publicised, with particular emphasis on the over-reliance on single-use plastic bottles.

In addition, a recent study has discovered plastic particles in bottled water, opening up wider questions about the purity of bottled water and what health effects these particles may have on those ingesting them.

Luckily, it's easier than ever to reduce the amount of single-use plastic bottles we buy and throw away, both in the home and in the workplace. By choosing a highly filtered drinking water system from Zip, there's no need to buy one-use plastic bottled water. Our drinking water systems can be used to refill reusable bottles with clean, pure tasting water, benefiting the environment and the health of the user.

To demonstrate our commitment to helping businesses reduce their plastic waste, we've launched the Reuse Refill Refresh campaign. For more information, please visit zipcommercial.co.uk/RRR

Plastic fibres have been found in the food chain, our tap water and now even bottled water.⁶ Zip MicroPurity filtration removes these microplastics down to 3 microns.

TEN REASONS TO SPECIFY ZIP

The world's most advanced range of drinking water systems

Drinking water is one of life's simple necessities that we often take for granted. However, you may be surprised to discover just how much of a positive impact the right drinking water solution can have, from improved wellbeing and productivity, to sustainability and cost savings.

One thing is for sure – tap water as we know it is a thing of the past. You have many options when it comes to mains-fed drinking water systems. We want to ensure that you have the information and support you need to make the right choice.

As creators of the world's most advanced drinking water system, our expertise in filtered boiling, chilled and sparkling water is second to none. World-leading water filtration, cutting-edge energy efficiency technology, unique safety features and a trusted track record across the globe mean you can be confident when choosing a Zip HydroTap.

Want to know more? Read on for the ten reasons to choose Zip.

151 Wardour Street, The Office Group

#01

The widest choice of drinking water systems

Boiling, chilled and sparkling plus hot and cold water, any way you want it. We offer the widest choice of water options and drinking water systems on the market. So, whether you need a complete refreshment solution for a busy multi-story office or chilled, filtered drinking water for a hospital or school, we can help.

You're not limited when it comes to capacity either – with models that can dispense up to 240 cups of boiling water and 373 750ml bottles of chilled and sparkling water per hour – businesses of all sizes are catered for.

1 'Ambient' describes the temperature of the water where there is no additional heating or chilling to the incoming cold water supply. You may need to run the tap for a while to get it to a suitable temperature.

#02

First-class filtration

Thanks to our advanced MicroPurity filtration technology, Zip drinking water systems deliver the cleanest, safest and purest tasting water on the market, free from odours and contamination.

In fact, our flagship product, the HydroTap G4, offers 25 times better filtration than a standard water filter jug, making it the best of any instant filtered water tap in the world.

Unlike traditional carbon blocks, our premium filters combine carbon and sediment blocks into one cartridge. They not only remove dirt, bacteria, microplastics and contaminants from the water that other systems may not remove, but also up to 97% of chlorine and 99.9% of microbiological cysts if present.

#03

Innovative technology

Leading the way in both performance and functionality, the technology behind our range of drinking water solutions is truly cutting edge, delivering the purest, safest and cleanest tasting water possible.

The HydroTap's fourth generation G4 technology has been perfected over 70 years of development and innovation, our drinking water systems are not only a breeze to maintain, but include exclusive features to save organisations energy, water and time.

SMART.
SUSTAINABLE.

Save time and energy

Did you know that office staff waste an average of four working days a year making hot drinks with a kettle?* With the convenience of our reliable instant boiling water systems, businesses can improve efficiency while reducing running costs.

It's not just employees who will be more efficient – all of our products have been designed to handle any level of demand, from busy workplaces to bustling family kitchens, all the while saving power. Our cutting-edge energy efficient technology keeps the water flowing without wasting a drop, so users can benefit from reduced electricity and water bills.

HYDROTAP BENEFITS:

Has an auto-sleep function that powers down the unit after a period of inactivity

Maintains its water temperature, so doesn't waste energy

Eliminates the need for energy-guzzling kettles

#06

Home and workplace wellbeing

Hydration has a huge impact on health and wellbeing. Whether in the office or at home, users notice a difference from having the convenience of filtered water at the touch of a button or lever.

Staying hydrated has never been easier with our range of drinking water solutions for home and work, offering irresistible filtered chilled, sparkling and boiling water, in an instant.

Those who drink more water enjoy a host of mental and physical health benefits; from improved brain function, cardiovascular, muscle and joint health, right the way through to keeping the body cool, skin supple and cleansing toxins.

For businesses, it's no secret that drinking more filtered water increases concentration, reduces downtime and fuels creativity, all while keeping staff happy and healthy. Plus, providing a reliable, pure tasting drinking water solution in the office is sure to boost morale.

#07

Safe and accessible

All Zip products are designed to be completely safe and easy to use, with unique boiling water safety locks and cool touch technology. Whether you're specifying a HydroTap or Hydroboil, you can be confident that the end user can use our systems safely, without needing to worry about spluttering steam.

Cool touch technology

We can also advise on accessibility, with a range of products that are compliant with the Equalities Act 2010 and Building Regulations Part M 2004. A number of sections in these regulations are relevant to drinking water systems and the measures that need to be taken to ensure those with disabilities can use them with minimum difficulty. We can supply accessibility levers and braille covers for the HydroTap Classic range, which are ideal for those with disabilities or limited dexterity.

Featured product
Zip HydroTap Classic with oversized levers
and braille covers.

Unparalleled design

Advanced functionality, made beautifully. With the widest choice of models, designs, colours and finishes on the market, Zip offers water and style at its best.

Gone are the days where poor design was excused if a product was functional. You can now choose a drinking water appliance that matches seamlessly with the design of the space you're specifying for. This is essential in today's modern, stylish offices where the kitchen often doubles as a meeting space. That's why we recently launched our HydroTap Design range to the commercial market, which is proving to be a massive hit.

Trusted worldwide

The first and last word in commercial drinking water systems, Zip Water is backed by 70 years' experience and a team of experts that are dedicated to finding you the right solution. We are backed by numerous third party accreditations (see page 79), building our image as a trusted brand across the globe.

We only provide the highest quality, most robust products, designed specifically for heavy demand environments. Our rigorous manufacturing standards mean that you can trust in the durability of every single system we produce.

Having worked with and supplied drinking water systems to a vast number of well-known brands, we hope you agree that our list of customers speaks for itself.

The Zip HydroTap

FOR WORK AND HOME APPLICATIONS

The Zip HydroTap G4 is the world's most advanced drinking water system, combining state-of-the-art technology, MicroPurity filtration and stunning design.

With the widest choice of water options on the market, you can choose from pure tasting instant filtered boiling, chilled and sparkling water, or all three.

Whether in a commercial for work environment or residential home, our range of HydroTaps offers a convenient, efficient and safe solution for all your hydration needs.

Beautiful design

Nine tap designs and twelve finishes to choose from.

Ultimate convenience

Saves precious time – no need to wait for the kettle to boil.

Pure tasting water

Our MicroPurity filtration delivers crystal clear, great tasting water.

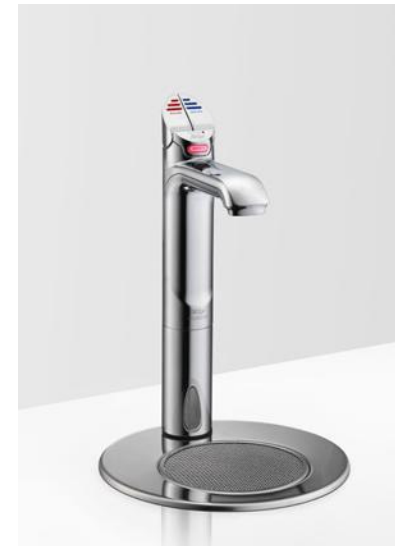

Boiling, chilled, sparkling, hot & cold

The widest choice of water options on the market.

HydroTap G4 can dispense up to 240 cups of boiling water and up to 175 cups of chilled and sparkling water per hour

Zip HydroTap range

Stand alone instant filtered boiling, chilled and sparkling drinking water tap (no mixer tap)

HydroTap Arc, Cube, Elite

Able to complement any interior – from traditional to contemporary – Zip’s design-led Arc, Cube and Elite HydroTaps have been created with the architect and specifier in mind. As practical as they are beautiful, the HydroTap Design range marries functionality and style.

Now available for the workplace as well as home, design-driven offices can now benefit from instant filtered boiling, chilled and sparkling water from a tap that doesn’t disappoint in terms of style.

Available in 12 colours, including standard bright chrome, brushed chrome, matt black and gloss black, and Zip’s Platinum range of finishes, including rose gold, brushed rose gold, gold, brushed gold, platinum, gunmetal, nickel and brushed nickel.

Commercial and residential models available.

HydroTap Classic

Offering the choice of instant filtered boiling, chilled or sparkling water, or all three in any combination, the iconic industrial design of the Classic remains a much-loved and popular choice suited to any workplace or home. A safe, energy-efficient and highly functional appliance, we offer models to suit a range of business sizes and needs.

Commercial and residential models available.

HydroTap Classic Industrial

In settings where safety, security and durability are top of agenda, look no further than the HydroTap Classic Industrial. Designed specifically for ease of use and robustness, the HydroTap Classic Industrial is made to last, even in the most demanding environments. Reliably delivering a choice of instant filtered boiling and chilled water with easy to use controls and unique safety features.

Commercial models only.

HydroTap All-in-One Classic

The robust HydroTap All-in-One offers filtered boiling, chilled and sparkling water, plus unfiltered hot and cold water from a single tap. Installed over the sink, its design is perfect for specifiers looking to blend contemporary aesthetics with industrial elements.

Commercial and residential models available.

HydroTap Arc

Featured product

HydroTap Celsius range

A choice of instant filtered boiling, chilled and sparkling water, combined with unfiltered hot and cold mixer tap

HydroTap All-in-One Celsius Arc

The ultimate in functionality, the All-in-One Celsius Arc offers all five water types – filtered boiling, chilled and sparkling water, plus unfiltered hot and cold water – from a single tap. And it's all wrapped up in Zip's enduringly elegant Arc design. Perfect for the workplace kitchen or in the home, users will benefit from everything you'd expect from the HydroTap, including advanced filtration and energy saving features.

Commercial and residential models available.

HydroTap Celsius Arc and Celsius Cube

Offering the same stylish look as the HydroTap Design range, but with an added space-saving benefit. The Celsius Arc and Celsius Cube deliver a choice of filtered boiling or chilled or chilled and sparkling water, alongside unfiltered hot and cold water for the sink, so there's no need for a separate mixer tap. Great for decluttering worktops to achieve that minimal look.

Commercial and residential models available.

Mixer Taps

Our Mixer Tap range has been created to match the shapes and finishes of the HydroTap Arc and Cube designs. This means that you can specify a mixer tap to deliver unfiltered hot and cold water for washing up, as a beautiful addition to match your client's HydroTap.

Mixer Taps are available in either vented or mains versions. Vented Mixer Taps provide hot water at 50°C for washing up from the HydroTap under-counter command centre, so a hot water feed is not necessary. Mains Mixer Taps require a hot and cold water feed.

A Mixer Tap can be used alongside the HydroTap Classic, Arc, Cube and Elite.

Water combinations available are:

- Filtered boiling, chilled and sparkling, plus unfiltered hot and cold water (5-in-1)
- Filtered boiling and chilled, plus unfiltered hot and cold water (4-in-1)
- Filtered boiling and ambient, plus unfiltered hot and cold water (4-in-1)
- Filtered boiling, plus unfiltered hot and cold water (3-in-1)

A colour and finish to complement any space

While our Standard finish options are anything but standard, we know that the demand for a greater range of tap finishes has never been higher.

That's why alongside our Standard finishes, our Platinum range of finishes features eight additional trend-led choices. So whether you're looking for a Scandinavian-inspired rose gold, an industrial gunmetal grey or a classic platinum, you can now choose a HydroTap that will match seamlessly with any interior style.

Filters and CO₂

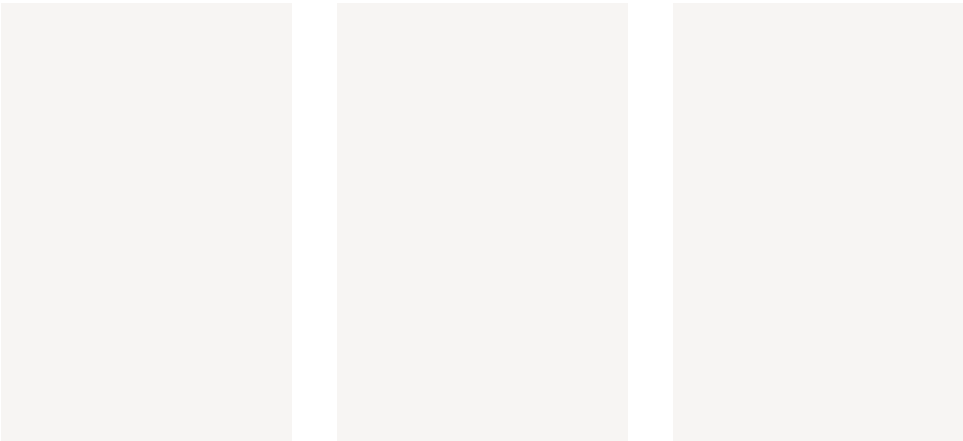

Zip Water UK’s range of filters transform ordinary water into a form that everyone will love. Our MicroPurity filtration technology is the most advanced on the market, producing crystal clear, great tasting water, free from odours and contamination including sediment, chlorine, heavy metals like lead, microplastics, bacteria and parasites (such as cryptosporidium and giardia).

We also recommend that those who live in a hard water area use a scale prevention filter to ensure the ongoing performance and longevity of their Zip system. Our HydroCare plan manages this for the customer, along with annual filter changes and servicing. Find out more about HydroCare on page 77. Otherwise, customers can contact us direct to order filter replacements and we will deliver them direct to their door.

Residential

FL1100
Zip Scale Prevention Filter (for HydroTap Base Model)

High performance scale filtration, including taste and odour, for the HydroTap Base Model. Significantly reduces impurities greater than 1 micron.

93701
Zip 0.2 Micron Residential Filter (for HydroTap G4)

Our leading 0.2 micron MicroPurity filter gives you the safest, cleanest and purest tasting water available. Delivering 25 times better filtration than a standard water filter jug, it expertly removes contaminants greater than 0.2 microns.

FL170
Zip Scale Prevention Filter (for HydroTap G4)

Triple action limescale filtration cartridge for the HydroTap G4, essential in hard water areas to maintain product performance. Speak to our team if you’re unsure about the water hardness in your location.

ZT400
Zip Food Grade CO₂ Canister

If you have a HydroTap that delivers sparkling water, you will need to replace the CO₂ canister when it runs out. Order online or over the phone.

Commercial

93702
Zip MicroPurity™ HydroTap Filter for Work 0.2 Micron (for HydroTap G4)

Our ultimate filtration, the 0.2 micron MicroPurity filter ensures pure-tasting water which is clean and safe. With WRAS approval, specifiers can be sure that the filter carries all of the required endorsements.

FL3600
Scale Filter Cartridge for normal commercial use (for HydroTap G4)

Replacement filter for more frequent use, this highly efficient filter removes particulates for clean, fresh water.

93703
Zip MicroPurity™ HydroTap Filter for Work HD 3 Micron (for HydroTap G4)

Providing efficient filtration for high-capacity models, Zip's 3 micron filter offers businesses the best filter lifespan, as well as great tasting water.

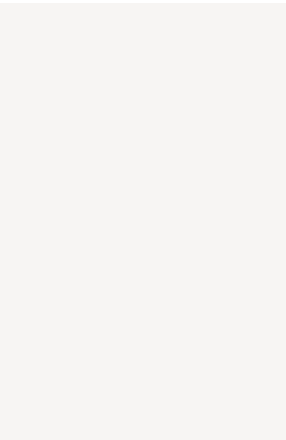

ZT402
0.2 micron Filter Replacement Cartridge (for HydroTap G4)

This filter cartridge for HydroTap G4 models only removes sediment, chlorine, heavy metals like lead, impurities, plastic fibres, bacteria and parasites greater than 0.2 microns.

FL250, FL500, FL1000, FL1500, FL2000
Zip Scale Prevention Filters up to 16,500 litres (for HydroTap G4)

Available in a range of capacities from 1,700 litres to 16,500 litres, this high-performance scale filter improves the taste of water and increases the lifespan of your Zip product. A must for Zip products installed in hard water areas.

ZT002
Submicron Filter (for non-HydroTap G4 models)

Suitable for HydroTaps that are not G4 models, this filter reduces chlorine and contaminants to provide great-tasting water.

FL2300
Scale Filter Cartridge for light commercial use (for HydroTap G4)

Ideal for light commercial use, this filter features triple action filtration to reduce water hardness and improve taste and odour.

ZT400
Zip Food Grade CO₂ Canister

If you have a HydroTap that delivers sparkling water, you will need to replace the CO₂ canister when it runs out. Order online or over the phone.

Air-cooling technology

Our air-cooling technology is energy efficient and does not use any water, so not a drop is wasted. This means savings for your clients, as well as upping your sustainability credentials, which is great for the planet too. What's more, when installed with the vent trays (93540, 93541) the under-counter cooling unit will not require any cutting of the cabinet door for additional ventilation. So it won't interfere with your kitchen design.

- INNOVATIVE AIR-COOLED TECHNOLOGY
- WATER EFFICIENT
- EASY INSTALLATION

HydroTap

Base Model

For residential

The Zip HydroTap Base Model has all the style, function and convenience you'd expect from Zip. Providing instant filtered boiling and ambient water at the touch of a button, the Base Model is available with either an Arc or Cube style tap in our range of standard finishes, including bright chrome, brushed chrome and matt black.

Featuring a compact command centre that's the smallest in Zip's HydroTap range, the Base Model is also great for kitchens with limited under-counter space. Users will benefit from scale filtration, improving the taste and odour of the water they drink and maintaining the performance of their HydroTap.

There is also the option of the HydroTap Base Model Celsius, which delivers filtered boiling water, as well as unfiltered hot and cold water from one tap, eliminating the need for an additional mixer tap for washing up.

HydroTap

G4

SMART.
SUSTAINABLE.
TECHNOLOGY.

For commercial and residential

With filtered boiling, chilled and sparkling, and hot and cold water, any way you want it, the HydroTap G4 range offers the widest choice of water options available on the market.

Enjoy world-leading filtration technology that's 25 times better than a water filter jug, giving you crystal clear, pure tasting water that's free from contaminants, bacteria, heavy metals and microplastics.

The HydroTap G4 also boasts a number of advanced energy efficiency and safety features, such as Power-Pulse technology, 'sleep when dark' mode, boiling lock and cool touch tap.

With a vast selection of designs and colours – as well as the option of fitting it over-sink or on-font – you'll be spoilt for choice and benefit from a tap that not only delivers on performance, but also looks at home in any design-led kitchen. Choose from our Platinum range of premium finishes, including rose gold, brushed rose gold, gold, brushed gold, platinum, gunmetal, brushed nickel and nickel.

When specifying a HydroTap G4 for a commercial project, you must select a commercial model, which has been designed to withstand the demands of these environments.

HydroChill range

FOR HIGH-CAPACITY APPLICATIONS

Introducing our new range of filtered chilled water systems for medium to large office and commercial locations, where demand is high and sustainability is vital.

HydroChill is a range of flexible, high-capacity, chilled water systems, which completely remove the need for unsustainable, expensive plastic bottled water thanks to superior filtration technology. So, unlimited hydration for employees and guests not only means a healthier, more productive workplace but a greener business.

Choose from chilled, sparkling and ambient, under-counter and counter-top models.

Hydroboil range

Featured product
Zip Hydroboil Plus

Instant on-wall boiling water

There's no need to wait for the kettle to boil with our recently redesigned Zip Hydroboil range, which delivers boiling water instantly from a reliable wall-mounted unit. As well as saving time, the Hydroboil range saves businesses energy and money too. Costing little to run, energy efficient design and electronic controls minimise power consumption, while simple-to-use fingertip control brings you a cup-full or teapot-full of boiling water at a time.

Hydroboil Plus

With all the benefits of the Hydroboil, the Hydroboil Plus also features energy-saving Power-Pulse™ technology, inactivity and low light sleep modes and is equipped with a two-way safety tap and safety lock.

BOILING

Hydroboil

Advanced boiling water technology and electronic temperature control delivers boiling water heated to within 0.2°C of set temperature. Enjoy no waiting time with this convenient, reliable and safe wall-mounted instant boiling water unit.

BOILING

Econoboil

Employs patented twin chamber boiling water steam-heat-boost™ technology to recycle energy from steam to pre-heat the incoming cold water. Also features thermostatic temperature control and is equipped with an external two-way classic tap.

Specify Zip HydroCare[®] for your client's peace of mind

HydroCare is our stress-free preventative maintenance plan, which will keep Zip products in the best possible working condition throughout their life, giving complete peace of mind.

Just like when you buy a car or invest in a new boiler, Zip systems will benefit from regular service intervals to maintain high performance levels and to keep the water it dispenses tasting great.

Rather than having to worry about essential servicing and filter changes, HydroCare has it all covered, leaving users to enjoy their Zip product for many years to come.

Why choose HydroCare[®]?

01	Fast and reliable We have a fleet of over 80 fully trained, directly employed engineers across the UK – at least one based in every county.	02	Save money HydroCare saves you money with every service while ensuring your product maintains its performance through its life.
03	Pure tasting water Regular filter changes, sanitisation and maintenance will ensure your Zip product continues to deliver pure-tasting water.	04	Peace of mind Take one thing off the to-do list with pre-scheduled services and filter changes.
05	Flexible HydroCare can be tailored to meet the exact needs of your home or business.	06	Expertise With almost 70 years' experience, Zip Water UK is the most trusted name in drinking water solutions.

Zip CPD seminars

At Zip Water UK we are committed to providing high quality training to industry professionals. Our accredited Continuing Professional Development (CPD) seminars allow us to share our expertise across many topics, including drinking water solutions, hot water systems, sustainability, office design and improving the workplace. We want to help you to understand the issues and regulations surrounding these subjects, which will ultimately improve the homes, workplaces and communities you create.

Sustainable design and the UK’s bottled water dilemma

In this CPD we examine the concept of sustainable design, which aims to reduce or eliminate negative impact on the environment and the people who live in it.

With a focus on drinking water, we discuss the importance of hydration and the effect that poor drinking water solutions can have in terms of sustainability and wellbeing – especially when it comes to the modern scourge of plastic bottles. And most importantly, why functional, sustainable

products should also be beautiful.

To book this CPD seminar or find out more about the library of CPDs we provide, please visit specify.zipwater.co.uk

DESIRABLE OBJECTS ARE MORE LIKELY TO BE SPECIFIED
MANUFACTURERS MUST IMPLEMENT SUSTAINABLE DESIGN WITH AESTHETICS FRONT OF MIND
IT IS YOUR RESPONSIBILITY TO SPECIFY OR RECOMMEND ECO-FRIENDLY PRODUCTS WHEREVER POSSIBLE
BEAUTIFUL, SUSTAINABLE DESIGN MAKES THIS TASK EASIER

Accreditations and regulations

WRAS

The Water Regulations Advisory Scheme (WRAS) is a conformance mark that demonstrates that an item complies with the high standards set out by the 1999 UK water regulations.

The WRAS logo certifies that our drinking water systems are safe to use in commercial and residential settings.

CE

All Zip Water UK systems have been fully tested and comply with EU safety, health and environmental requirements.

NSF

Our 0.2 micron MircroPurity filter has been tested and approved according to NSF/ANSI Standards 42 and 53, evaluating the safety and structural integrity of point-of-use/point-of-entry (POU/ POE) drinking water filtration systems and certifying the health and safety of drinking water.

Standard 42 covers aesthetic (taste and odour, chlorine, particulate) claims, while Standard 53 addresses specific health-related contaminants that may be present in drinking water, such as microbiological (including filterable cysts) or chemical (including pesticides and lead).

Equality Act compliant

Whether refurbishment or new build, architects, contractors and facilities managers are expected to ensure high quality disabled access, no matter the size of the business. We offer systems and accessories that will comply with The Equality Act 2010, Building Regulations Document Part M, BS8300 and the National Planning Framework. Speak to the experts at Zip for best-practice recommendations.

BREEAM compliant

An increasing number of UK construction projects are being considered for BREEAM accreditation. BREEAM (The Building Research Establishment Environmental Assessment Method) was first published by the Building Research Establishment (BRE) in 1990 and is the world’s longest established method of assessing, rating, and certifying the sustainability of buildings.

Our drinking water systems all contribute to attaining credits within the Water section of the BREEAM UK New Construction 2018 guidelines, helping a building to achieve its overall BREEAM rating.

RoHS compliant

All materials involved in Zip HydroTap manufacture comply with the European Restriction of Hazardous Substances Directive 2011/65/EC.

Red List compliant

Our systems are designed to meet the sustainable initiatives of the Living Building Challenge by eliminating prohibited materials

shown on the LBC Red List.

Environmental Product Declaration (EPD)

An EDP is an ISO standardised tool to communicate the sustainability of a product or system. Voluntarily developed, it contains quality-assured and comparable information regarding the environmental performance of products. You can download ours via the zipwater.co.uk website.

Sectors

Whether you’re working on a new build or a refurbishment, we have the drinking water solution to match your exact requirements. Every application has its own challenges. We know that the needs of a multi-story office can differ greatly to that of a hospital or café, and you can be confident that this expertise is right at your fingertips.

We invest in understanding your industry and its regulations, making sure you always specify the right solution.

Offices and workplaces

We're a one stop shop for convenient and efficient WRAS approved office drinking water systems, whether you're specifying for an SME or a large blue chip business. Our experts can tailor a bespoke solution that caters for any number of staff, from two to 2000 or more.

We know it's no longer enough to deliver high performance, functional products – the contemporary office calls for products that look great too. That's why we offer the widest choice of designs and finishes on the market.

And with sustainability at the top of the agenda for many businesses, our high capacity drinking water systems dispense unlimited volumes of highly filtered water, so plastic bottles can become a thing of the past.

Healthcare

Patient health and wellbeing has to be at the centre of any healthcare specification. Over the years we have worked closely with a number of NHS Trusts and private hospitals, developing our product range to ensure we have the perfect drinking water solutions for these high demand environments. Hard working, energy and cost efficient systems are required to stand the test of time and heavy use, whether by staff members, patients or visitors.

Whether in a hospital, staff room, or mental healthcare application, safety and ease of use are also an important consideration. We ensure that our products have Equality Act compliant options and are simple to operate for the elderly, infirm and disabled.

Education

From schools to universities and training facilities, the provision of drinking water is fundamental to the health, wellbeing and productivity of students.

The School Premise Regulations 2012 state that good quality drinking water must be readily accessible, with no scalding risk from hot water, and it is generally preferable if drinking water supplies are connected directly to the cold water mains. Our experts can help you meet these regulations with our range of cost effective mains-fed drinking water solutions.

Thanks to our systems' unique safety features and simple operational controls, students and employees alike will benefit from pure-tasting filtered drinking water in an instant, without the worry of spluttering steam or scalding.

Industrial and institutions

In settings where safety, security and durability are top of the agenda, we have a number of suitable products to do the job. The HydroTap Classic Industrial, for example, is designed specifically for ease of use and robustness. It is made to last, even in the most demanding environments, reliably delivering a choice of instant filtered boiling, chilled and sparkling water via large, easy to use controls.

In high security environments, our market-leading safety technology will give clients complete peace of mind and protect the end user from harm. Our hardwearing, reliable drinking water systems are WRAS approved and suitable for high risk locations, with features like portion control allowing for management of the amount of water dispensed and high strength anti-vandal design.

Retail

For retail applications, we know that both customers and staff need to be considered. From a front of house perspective, we have a wide range of solutions catering for any space and capacity requirement. While being able to withstand high volume use, these systems also look professional and stylish, adding value to the customer's experience with the brand in question.

The busy retail environment calls for systems that will allow staff to make the most of their breaks, without having to wait for kettles to boil or purchase environmentally harmful bottled water. Our range of drinking water systems include dispensers that rapidly deliver filtered boiling, chilled and sparkling water, while being easy to clean and maintain.

Hotels, restaurants, bars and cafés

Our reliable, functional products can deliver limitless amounts of filtered drinking water without letting staff and customers down during the lunchtime rush. Front of house, ultimate convenience and speed is matched by our wide range of designs and finishes to blend beautifully with any interior. Our high capacity filtered drinking water systems can be used alongside stylish branded glass bottles, removing the need to buy-in expensive and unsustainable pre-packaged plastic bottles for table water.

From a catering perspective, kitchen staff will wonder how they ever lived without instant boiling, chilled and sparkling water. Speeding up many cooking processes, whether it's cooking beautifully al dente pasta or blanching vegetables, results in consistent, great tasting food, fast.

Sectors

Leisure, sports and stadia

From golf clubs and local sports facilities to international stadia and events venues, we know that whatever the size of the site, it is crucial to provide energy and water efficient drinking water systems that will deliver consistently, keeping costs down and large numbers of customers happy.

Whether in a kiosk, conference centre or arena, the ability to serve hundreds of people in a small window of time is key to keeping queue levels to a minimum while upping return on investment. We've developed a number of high capacity systems that can deliver instant boiling, chilled and sparkling water with a fast fill rate and reliable performance. And for areas that are tight on space, we have a wide range of wall mounted, counter top and under-counter solutions to fit the bill.

Regulations for providing drinking water in the workplace

- The law requires that you provide drinking water and ensure that:
- It is free from contamination and is preferably from the public water supply
 - It is easily accessible by all employees
 - There are adequate supplies taking into consideration the temperature of the working environment and types of work activity
 - Cups or a drinking fountain are provided

Residential

Whether you're specifying for a one-off luxury penthouse or a large scale development, we have models and price points to suit all client needs.

The design of houses and apartments requires knowledge of the lifestyle of the tenant or homeowner and it's no secret that including must-have appliances and high quality finishes can help secure that final sale. Boiling and chilled water taps are no longer seen as a luxury and are growing in popularity year-on-year, giving homeowners the convenience they need to lead a healthier life when time is short.

Our HydroTap Design range gives you the choice of three designs and 12 on-trend finishes, including gunmetal and brushed gold, enabling you to create that aspirational look that makes a property truly desirable.

Local authority and public buildings

The nature of public and local authority buildings is that they are used by many different people, all with their own needs. In high footfall areas, whether it's a transport interchange, community-based services or council building, the requirement for durability and longevity are most notable.

Against a backdrop of tighter public sector funding, any work to improve services must be coupled with a focus on cost saving and sustainable solutions. Energy performance is key to specifications in this industry, as all public buildings larger public buildings over 500m² must display a Display Energy Certificate (DEC), and we offer the most advanced energy efficient technology on the market to meet this need.

There's a Zip HydroTap for every application and environment

Case study: Sleeper Magazine HQ

Leading voice on global hotel design, development and architecture, Sleeper Magazine is a beautifully designed publication – requiring an equally stunning office space to inspire its staff. Creative design studio NoChintz was brought on board to create a stylish yet functional work environment, which included the addition of a new HydroTap.

The Sleeper Magazine office is located in the iconic heritage listed Strawberry Studios, Stockport, once frequented by Joy Division, Paul McCartney, The Stone Roses and The Smiths to name a few. Being sympathetic to the history of the building was important to NoChintz, who designed the space to include subtle features that hark back to the 90’s music industry, with a modern twist.

LOCATION
STOCKPORT, ENGLAND

PRODUCT
ZIP HYDROTAP CLASSIC

By assessing how the office works day-to-day, NoChintz’s workspace team was able to build a co-working concept to encourage conversations between colleagues with zoned areas, flexible working solutions and comfortable breakout spaces.

A new large kitchen area was created, making the most of the office’s open plan design. Light, bright and contemporary in style, the kitchen has become an important hub for staff. A Zip HydroTap Classic was chosen to keep the Sleeper team powered up with filtered boiling water for tea and coffee, and filtered chilled and sparkling water.

“It’s sleek, clean and incredibly convenient compared to the kettle – we don’t have to queue for drinks anymore, so we can get on with more important things!”

Becky Archacki, commercial director, Sleeper Magazine

Case study: Pip McCormac

EDITOR OF RED MAGAZINE AND AUTHOR
OF THE HERB AND FLOWER COOKBOOK

When interiors and food editor Pip McCormac made the decision to move back into his flat after renting it out for seven years, he knew it would take more than a lick of paint to make it feel like home again.

“I remember walking through the door and just feeling so deflated and uninspired. I loved my flat but couldn’t imagine how it would now be the space to get my creative juices flowing!”

Not only has Pip been a top journalist for the past 15 years, writing for the likes of Red, Elle Decoration and The Sunday Times Style Magazine, he is also the author of a cookbook. The Herb and Flower cookbook was born from Pip’s love of windowbox fayre, growing a whole host of plants and flowers – all for eating. With this in mind, the flat’s kitchen no longer suited Pip’s needs. Small and separate from the living room, it wasn’t conducive to social evenings cooking for friends.

PRODUCT
ZIP HYDROTAP ARC
AND MIXER TAP

It was only after staying with friends who had a Zip HydroTap, that Pip realised his new kitchen wouldn’t be complete without one.

“My filtered boiling, chilled and sparkling HydroTap is used all the time. The chilled water encourages me to drink more water and the instant boiling water makes cooking processes so quick, especially when combined with my induction hob. Of course, I had to have a gold one to go with my colour scheme, and I also went with a matching mixer tap to complete the look.”

“I’d never really considered that a boiling tap could have such an impact on daily life, but after using one for a weekend I was hooked!”

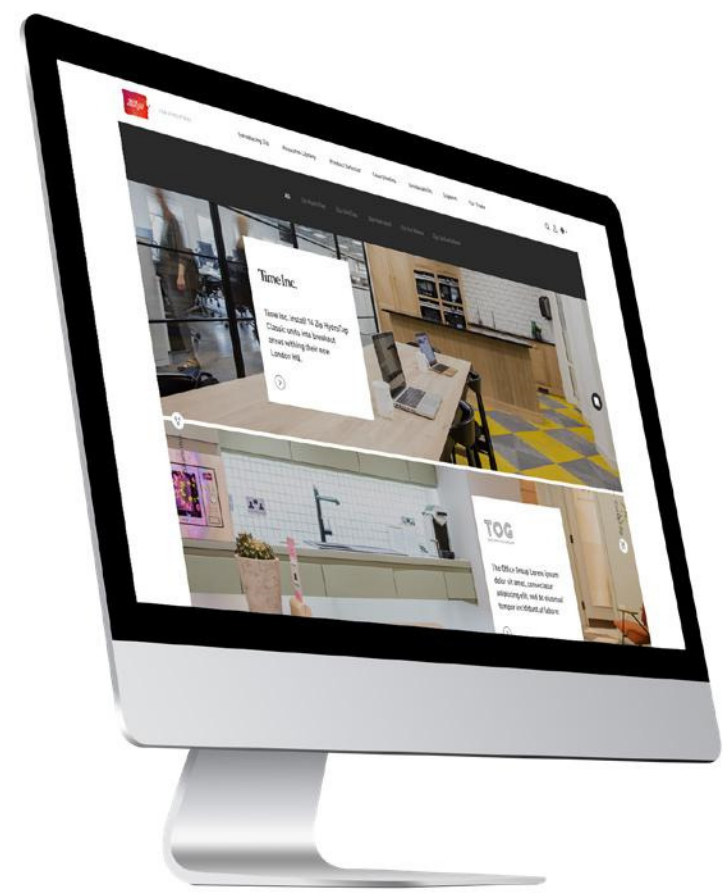

Pip McCormac, Journalist and Author

Specification made easy

With our online portal it has never been easier to select the system to fit your specification. You have a full resource library at your fingertips, where you can simply search, select and download BIM files, specification sheets and product literature.

The portal has everything you need in one place, from information about sustainability and regulations to a wide range of case studies, making it an indispensable tool for specifiers. Login from anywhere and find what you need, fast.

Visit specify.zipwater.co.uk to get started.

CH103	140	Ambient*	0.45	355 x 290 x 385

*‘Ambient’ describes the temperature of the water where there is no additional heating or chilling to the incoming cold water supply. You may need to run the tap for a while to get it to a suitable temperature.

It's water. Refreshed.
