

Zip HydroTap G4 0.2 Micron replacement filter cartridge

Model no: ZT402

Description:

Replacement Zip 9.2 micron filter brings you what is arguably the most advanced and most practical water filtration system available anywhere in the world today, developed to meet Zip's exacting specifications by the world leader in water filter technology.

The Zip 0.2 micron filter puts crystal-clear, better tasting water on tap, filtering out chlorine taste and odour, lead and impurities as tiny as one five-thousandth of a millimetre, including protozoan cysts such as scale in boiling water appliances, but does not remove beneficial fluoride.
