Willis Jacket complete external Immersion Heater prewired fully assembled.

Product No: J002

Connection size: 15mm bsp top and side connections c/w nuts and olives.

3Kw immersion heater fitted with thermostat with safety cut, assembled in a Willis Jacket (made of copper). The immersion and copper Willis Jacket are bonded together for your convenience.

Prewired with heat resistance cable and fitted with heat resistant polymer formed terminal cover and are appropriately insulated.

This high quality heater is UK made and produced to meet European standard EN 60335. The modern replacement for the WILLIS, JACKET. It is an efficient immersion heater system, fitted externally to the hot water cylinder. It provides small quantities of hot water very fast, and can be used on Economy 7 to heat a full cylinder overnight for extra cost efficiency. Easily fitted, very easy to replace and eliminates removal problems often encountered with conventional immersion heaters. This unit comes complete with fitted element, safety thermostat and heat-resisting cable.
