Immersion Heater c/w thermostat

Material: Incoloy 825
Length: 27”
Connection: 2 ¼” BSP in 2 ¼” solid brass head

Function:

The Incoloy 825 heaters are suitable for areas where severe water corrosion is encountered.
The range includes heaters to MAXISTORE specifications (extra long life/low noise) and DUOTHERM Dual immersion Heaters.
The thermostat is a single thermostat with built in manually resettable thermal cut-out.

All are designed to meet current and future UK and EEC Standard requirments, including the new EN Standards applicable from 2004.
